WELCOME TO SMARTER

Small Business Security

powered by  **ALARM.COM**

POWERING THE **Smarter Small Business**

Your Smarter Business Security system will do more than just protect your property, inventory and employees. It delivers value and peace of mind every day by ensuring key business functions are operating smoothly.

PROFESSIONAL GRADE Security

With a reliable professionally monitored system you'll know that your business properties, inventory and employees are always protected.

- Use auto-arming to ensure that your system is always armed when it should be.
- Cancel false alarms through the app no matter where you are.
- Easily add or remove user codes to manage access for new or terminated employees.
- Manage multiple sites from one centralized dashboard.
- Keep an eye on inventory and equipment with video surveillance.
- Know instantly about unexpected events like a storage door opening at an unusual time.

ALWAYS KNOW

Who's Coming and Going

Easily track and manage access to your property with fully integrated access control.

Integrated locks, controllers and card readers help you understand who's in and around the business at any time.

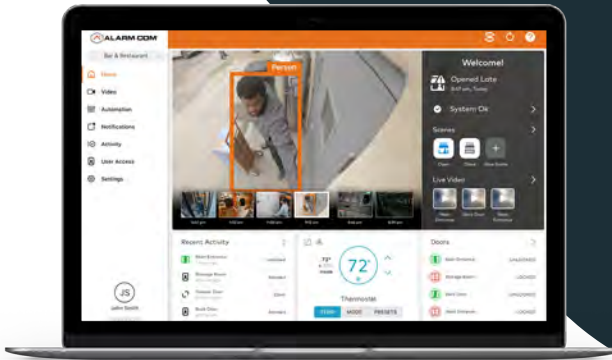

Commercial-grade locks help keep offices and back rooms secure.

Remotely lock and unlock doors for staff and deliveries.

Quickly add and remove users or restrict entry to sensitive areas.

Receive notifications when an area has been accessed at unusual times.

With Video Analytics your cameras can distinguish between people, vehicles and animals to deliver video alerts that matter most to you. For example, get a video alert when a delivery truck arrives, or a restricted area has been **accessed**.

KEEP AN EYE ON **Business**

HD commercial-grade cameras provide crystal clear video so you can stay connected to your business from anywhere.

View live video streams through the website or app anytime.

See indoor and outdoor activity to manage employee and customer traffic.

Record video on-site and to the cloud at the same time.

Secure, reliable cloud storage cannot be disabled or damaged if your business experiences a fire or flood event.

Quickly find the events that you need to see in your video timeline.

SAVE ENERGY, **Save Money**

Use connected smart thermostats and lighting to keep your business comfortable 24/7, and prevent employees from making costly changes.

Control your smart thermostats automatically, and on-the-go.

Use thermostat schedules to automatically save money during closed hours.

Get notified when the thermostat setting is changed, or the refrigerator door is left open.

Easily set up lighting schedules to keep your business safe and well lit, reducing liability risk.

DETAILED Business Insights

Quickly access critical information about your business across multiple locations, through daily, weekly and monthly reports.

Receive real-time notifications if employees are opening late or closing early.

Gain awareness and evidence of activity in sensitive or restricted areas.

Receive notifications if employees are arriving late or leaving early.

View graphs of your busiest times of day to make informed staffing decisions and track the impact of promotions.
